

professional series
pop mop™

Pop Mop™, an incredible new flat mopping system featuring a mechanism to remove dirty clothes and pads ... touch-free.

Microfiber and flat mop tools are more popular than ever. They are effective, efficient, but have always had one common objection, touching the dirty cloth.

Now there is a solution! Introducing the Pop Mop™ series: easy to use cleaning tools designed to eliminate the need to touch the dirty cloth or pad. At home and at the workplace, Pop Mop™ tools clean the same as many familiar tools, but better, because you do not touch the dirty cloth.

Available in three models ... home, pro and pro deluxe.

introducing the
edge bucket
Item #3050

A large 24" opening and 7 gallon capacity for professional jobs. Made from durable polypropylene with molded graduation marks inside. Use the edge bucket with pop mop pro deluxe and other systems.

Includes the unique **edge** blade to control solution saturation of pads. Featuring heavy duty 3" casters, locking and non-marking. Super sturdy handle and lightweight.

professional series
pop mop™
releasing cloth

pro deluxe

To remove the microfiber pad, all you have to do is press the two red buttons on the top of mop and the mop eject the pads.

pro

To remove the microfiber pad, align plastic housing to contact posts, then push housing down to eject the pad.

home

Removing the disposable cleaning cloth is simple and easy. Just press the button on the top of the mop and the cloth releases freely for disposal.
